

red laser green laser

(a) the detector

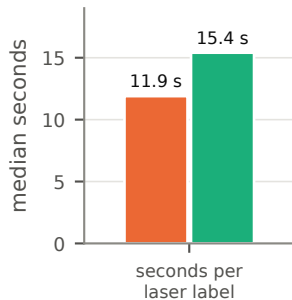

Same camera and setting: green misses 16 pt more dots (95% CI 10 to 22).

(b) the whole pipeline (reef)

Mostly a difference between dives: on one site and day, green is 6 pt lower (1 red, 2 green dives).

(c) the labeller

Same labeller: green takes 1.8 s longer (CI 0.5 to 2.9).
